February 8, 2012

National INAD Program Participants:

At long last the AADAP Office is pleased to announce the launch of the INAD Program Management System (IPMS) - On-line Data Reporting database. All facilities/investigators and monitors will need to create their accounts in the IPMS for enrollment into the INAD Program for 2012. All 2012 INAD data (i.e., study requests, drug receipts, reports, INAD inventory, etc.) will be entered directly into the IPMS. If you have submitted any 2012 study worksheets or study results to me, please note you will need to re-enter this information into the IPMS. This is because my MS Access database will contain only data from 2011 and earlier, while the IPMS will contain only data from 2012 and beyond. Invoices will be sent out the middle of March so please be sure to create your accounts by February 29 if you plan to participate in the 2012 INAD Program.

Current INAD drug inventories that your facility has on hand will need to be entered into the IPMS so drug inventory forms can be filled out by the IPMS. Please enter the applicable information into the Drug Receipt section and enter the amount you have on hand as the amount to start the inventory form with. Here is an example of how you would fill out a drug receipt form for INAD drug previously reported:

> Facility received 50 kg of chloramine-T in 2010 (and already reported it to me);
> 35 kg of chloramine-T has been used in treatments conducted in 2010 & 2011
> Amount received on Drug Receipt (Form 1) in the IPMS system will be 15 - this is your current INAD drug inventory

As with any new program there may be some bugs that may need to be worked out. Please contact me right away with any problems you encounter when entering your data into the IPMS (i.e, data not saving correctly, not able to move to the next stage, etc.). We also welcome any suggestions or comments you may have once you start using the IPMS. And we may be able to incorporate these suggestions/comments in any future revisions to the IPMS. Currently, the create study reports features and viewing the mortality graph are still being completed. I will let you know when these features are working and I know you will like the reports that are generated with your study results.

We are aware that some email notifications are unreadable due a dark text box around the text if you are using Internet Explorer as your browser. So far emails received using msn and yahoo

email accounts are very hard to read; however, you can print these emails just fine or you could use another internet browser. I was able to view the notifications using the FireFox browser when using my msn email account. The database programmer is aware of this problem and will work on fixing this bug.

The IPMS can be found at the following link: http://www.aadapinad.com/ . Please remember that **Study Monitors need to create their accounts first** before the Investigators create their accounts. I have also attached a training manual to help guide you through the website and answer any questions you may have. Please note that this manual is still in draft form and we will be adding screen shots to it in a few weeks. As always if you have any questions please contact me at 406-994-9905 or send me an email. Thank you and good luck!

Sincerely,

Bonnie Johnson
National INAD Program Administrator
